

Agile

User story 1: As a vanilla git power-user who has never seen GiggleGit before, I want to learn what the git commands are so that I can use the git command easily.

User story 2: As a team lead onboarding an experienced GiggleGit user, I want to ensure that GiggleGit is understood to manage different branches and merge for my team members.

User story 3: As a new user of GiggleGit, I want to be able to learn what each commands stand for easily.

Ticket 1: User Manual on Terminal

- It is crucial that users of the command line interface are able to access the documentation on the terminal so that they do not have the need to go back and forth between a web browser and a terminal.

Ticket 2: Visualized Documents

- For graphical user interface users, it is vital to create a visualization that is easy to understand the system of GiggleGit.

This is not a user story. Why not? What is it?

- As a user, I want to be able to authenticate on a new machine
 - The sentence above is not a user story, but rather a functional requirement because it does not give a user goal or pros.

Functional Requirements

Goal: *"To create a platform where students can virtually make friends in their school area, fostering community and social connections."*

Non-Goal: *"To facilitate in-person meetups or events without parental consent or proper safety measures."*

Non-Functional Requirement 1: User Privacy

- Functional Requirement 1: Implement privacy settings that allow users to control who can view their profiles and personal information.
- Functional Requirement 2: Develop a moderation system that allows users to report inappropriate behavior or content, with a team to review and address reports promptly.

Non-Functional Requirement 2: Personalized Performance

- Functional Requirement 1: Implement an algorithm that analyzes user behavior to provide personalized friend suggestions and content recommendations.
- Functional Requirement 2: Allow users to personalize their profiles by selecting interests, hobbies, and activities they enjoy.
